“With PGB I am able to implement a plan that gives my employees local access to key physicians, and we benefit from local discounts.”

- Satisfied PGB Client

Offers Global Solutions

Hire the global consulting firm that has unprecedented reach across the employee benefits marketplace. We can help your organization more effectively manage global employee benefits while we reduce overall costs. We are a premier international benefits consulting organization that is focused on expatriate benefits and general business insurance. The PGB team has experience managing close to \$1 billion in annual global premiums while working for some of the largest corporations.

Discounts and Cost Control

Gain global solutions that provide access to local networks. This approach gives companies local discounts for services and increased cost control. Local pricing is traditionally two times lower than expatriate pricing with many providers and locations globally. PGB only recommends vendors who have robust networks and cost containment procedures. The result is greater price control and happier, more productive employees.

Leading Global Providers

Choose international group benefits programs from Paul Global Benefits, so all your employees will be well taken care of. PGB works with the world’s largest carriers who have networks and physician groups in virtually every location around the world. The direct network model uses cashless vehicles, which means a more positive employee experience.

Global Innovations

Partner with the company that is dedicated to pushing the market to think differently about global solutions. PGB has a track record of creating innovative solutions to challenging global benefits issues. We lead the market in providing solutions for our clients that add value to their overall programs. Many of our innovations have been adopted by insurance companies as the new standards for services and products.

Unparalleled Service

At Paul Global Benefits we use a *continuous consultation* strategy that includes carrier management strategies, overall benefit management strategies and cost control strategies. In addition to this service model, all programs endorsed by Paul Global Benefits have customer service available 24x7x365 to meet your employee needs. Our partner carriers have unprecedented language capabilities, currency reimbursement solutions and international health advisory teams focused on making your employees as productive as possible. PGB has extensive experience and knowledge with international markets – everything from repatriation to medical evacuations. We do it all so you don’t have to.

PGB’s Continuous Consultation Strategy

As a PGB client, you benefit from three consultative solutions:

Weekly HR Calls

We review claim issues, audit bills, and address plan questions with the HR team each week.

Weekly Carrier Calls

We work with the insurance carrier to address plan issues our client faces, such as claims, plan design, communications, or trends in customer service in a weekly call. Each month we review the financial results with the carrier to determine plan performance.

Executive Reporting

We talk to senior managers as necessary to make sure they receive key information on plan performance. We complete executive summaries for them to share internally and quarterly financial reports for executive review.
